User

honestly, it's been a week. My dog has been barking all morning, sorry if you hear him. Anyway, I log into RocketShip every Monday. The first thing I notice is that the new blue navigation bar is really bright, like hurts my eyes bright. Can we change that? But yeah, so I go to the 'Quarterly Reports' tab. I select my date range, usually last 90 days, and hit 'Generate PDF.' That works fine. But then, and this is the part that makes me want to scream, I try to click 'Export to CSV' because I need to pivot this in Excel. It spins for like 5 minutes and then just crashes. No error message. Just blank. I've lost hours because of this. I end up just taking screenshots of the table, which is stupid. Oh, and I'd love a dark mode.

Waiting for Human Input

Report summary

Export to CSV feature causes crashes without error, impacting workflow significantly.

Confidence of insights: High

Rank	Risk	Confidence	Strategic alignment	Suggested action
1	Export to CSV crashes	High (90%)	P0 - "I try to click a button, the app hangs/crashes"	Investigate and resolve CSV export crash issue.
2	Brightness of navigation bar	Medium (70%)	P1 - "I can't read the text, I get a headache"	Consider adjusting brightness or adding adjustable themes. NEEDS PM REVIEW
3	Desire for dark mode	Low (60%)	P3 - "I'd love a dark mode"	Explore feasibility of implementing dark mode; consider for future updates.

Confirm action: Investigate and prioritize a fix for the export to CSV feature. Review possible UI/UX improvements for brightness and dark mode suggestions.
